

Isamune®

Keep your body's immune system healthy and ready to fight.

Why Isamune will give you powerful immune support:

- Contains the highest quality of bovine colostrum, which can help to rebuild the immune system and boost immune response. Colostrum is a rich source of nutrients, vitamins, minerals and antibodies.
- The bovine colostrum in Isamune helps to accelerate the healing of all body tissues and replenish the body from aging.*
- Isamune is formulated using an exclusive patented proprietary process that preserves the highest level of immune support in colostrum. Our source bovine colostrum contains the highest levels of immune-building antibodies.
- By raising both general immunity and physical strength, our colostrum formula is ideal for the whole family.*
- Our colostrum comes from hormone-free California cows. The milk is BSE-free and BST-free.
- The great tasting natural vanilla flavor comes in a convenient spray bottle.

Supplement Facts

Serving Size 2 mL (3 sprays) or 0.66 mL (1 spray)

Serving Per Container 62 or 187

	Amt Per 3-spray Serving	Amt Per 1-spray Serving	% Daily Value*
Proline-rich polypeptides (from fresh grade A bovine colostrum)	6mg	2mg	*

* Percent Daily Values are based on a 2,000 calorie diet.

Isamune®

Frequently Asked Questions

How does Isamune support my immune system?

Isamune helps to provide your body with proline-rich polypeptides, which regulate inflammatory response. It helps to restart your immune system. When you take Isamune on a regular basis, you provide your body with informational protein that may support your immune system.

How is Isamune different from other products?

Isamune is formulated using an exclusive proprietary patented process that preserves the highest level of immune support in colostrum.* Our exclusive colostrum is collected from BSE-free, BST-free, hormone-free milk for Isamune.

What is colostrum and how does it work?

When babies are born, their mothers produce immune fighting milk for the first 24 to 48 hours after giving birth. This “first milk” or “immune milk” is called colostrum. Colostrum is naturally packed with nutrients to help an infant survive outside the womb. Scientific studies prove that colostrum’s nutrients help support healthy immune strength. The active nutrient is Proline-rich Polypeptide (PRP). As people age, the level of PRP in their bodies decline, reducing the body’s natural ability to protect itself and promote healthy cell growth. You may experience:

- More well days
- Greater overall health
- Enhanced exercise performance
- Stronger immune response
- Improved GI health

When should I take Isamune?

Isamune can be taken as needed to provide support for your immune system up to 3 sprays twice daily. Spray into mouth and hold for 30 seconds, then swallow.
